Same bill means you use the same address for billing and for shipping, also refers to AVS check (Address Verification System).

Yes you can use a CA card to card to NJ but just a little note - US apple store is a much more strict on data verification than its other overseas stores.

TIP!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!READ THIS!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

a few pple PM me on how to card abesofmaine.com. well the only thing i did was i had a fresh US cvv2 and on my shipping name i used the same last name as on cvv for example if cardholder name is Jenn Rock on my shipping name i put John Rock. understand..and on comment box itype a message that makes it seem like family - related...for example i used a comment familiar to this....John Rock, please leave store open on Thursday And Fridays now and call me as soon as you recieve this item . Amazon.com is still cardable, but you need:
hacked account;
complete credit card with billing address (AVS).

Most customers use the same password in diferent sites, you can hack an account if the hacked password is the same password in Amazon (almost any shop site use

passwords). Then you need a new email (yahoo.com hotmail.com etc). Change the email (first see for new orders, and only use inactive accounts). If you made all, you can card in Amazon.com. I carded \$800 per order, but I try a first order of \$100 or \$150.

There are brazilian cardable sites, that ship worldwide (books and cd's):

www.somlivre.com

www.siciliano.com

www.livrarianobel.com.br

You can use Mastercard with fake cvv in these three sites.

When card in walmart.com, you should use Amex to bypass Visa verified(!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!)

Hey Yo'll ever read this book the "emperor's new cloths" this thread is like it no
~censored~ real sites with ~censored~ worth selling to make for you risk ya taking
lolololol some post sites you can card chocolates lololoooooooooooooooooooool the
only good site in here is maybe <http://www.apple.com> and <http://www.dell.com> i took
from this thread <http://www.dhanish.com> thought i was gonna get me some GOLD!!!!!! i
went there and got some for 8 bucks worth looooooooooooooooooooooooooooool so for a
change today i will post a real cardable site and how to card it!!!!!!!!!!!!!!!!!!!! so
all yo carders that been carding ~censored~ for a living and need better stuff go
right now to <http://www.officemax.com> like the past one month i carded it with
generated platinum amex's orders totalling \$3000 max and \$500 lowest if ya know
how to generate a dead platinum amex then card ya self some wicked stuff!!! so
here is goes first off buy something worth about 200 dollars max after it gets
shipped buy anything ya want and i mean anything am gonna leave logs here just so
you know am not lieing so please get yaself some cash!!!! use a fresh drop never
used on that site will work best, bill and ship to your drop believe it or not it
will WORK!!!!!!!!!!!! then put your drop as card holder for cvv2 put 0000 thats what i
use make sure this is a platinum amex. So do all this right like i have said and
you will get an order confirmation with subject "orderinformation" in ya email the
order status should be "opn" next day you should get another one with same "opn"
when this happens you should get one more saying "dlv" when you get this brov let
your drop know asap! he has to be there in person to sign cos officemax does not
leave on door or anything like that!!!!!! someone has to sign out for em when your
order goes through use same account login and pass and SAME card number use same
0000 for cvv2 card anything below \$3000 card everything ya need i kept ma account
for 3 weeks before it died i carded totall about \$17000.....how did i find this
formula out don't ask me please just enjoy ya carded stuff! i posted this thing so
am no hypocrite when you get shipments post feedback to support other
members.....this is one of my orders there orders# 098853885 zipcode: 45638 go

check the orderstatus!!!!!!!!! shop till ya drop

Don't pm please ...

You should have a drop in USA and Pro carder who got fulls if you don't have and card
bestbuy or dell and split the money with the carder, drop...
with cvv2 it's possible but none will tell you the truth ... but sometimes we can
post something you understand like me and my nigga Darkmoon and neo too ..
If you have usa cvv2 card with diff bill ship and match your state with the proxy
this called ip billing match ... and try to ship to the same city as your billing
this called distance btw bill and ship , adjust your computer time:
worldtimeserver.com with billing city , exact phone if they don't call or busy if
they call or fax too ... , clean and shred your files and use socks and ssl
elite 100 other tricks also ...

This all for the newbies they ask the same questions ...
